

Introduction to R Workshop Series

This series is for any researcher with an interest in learning how to program in R - it's perfect for students interested in building their coding skills or for researchers looking for efficient and reproducible ways to analyze data.

No coding experience required!

Presented by Sean Nguyen

1: Intro to R

Learn about R and how to easily clean and visualize data

2: Import and clean data

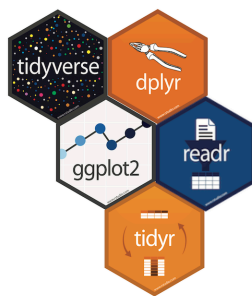

Learn to import, explore and clean up raw data with tidyr and dplyr

3: Graphing with ggplot2

Learn to visualize data with ggplot2

4: Course review and statistical tests

Review workshop material by working on a mock dataset

Required Materials:

Laptop computer running Windows, MacOS or Linux with wireless internet connectivity
